TIMSS 2011
Field Test of
Mathematics and
Science Items

The TIMSS 2011 field test was conducted in March-April 2010. The following exhibits provide a detailed summary of the field test effort, including the number of students, teachers, and schools that participated, and the number of items listed by format, content domain, and cognitive domain. Approximately 10,000 student responses from more than 40 countries per grade were used to evaluate the measurement properties of each field test assessment item. Most of the countries that participated in the fourth grade field test were also field-testing PIRLS items as part of the TIMSS-PIRLS 2011 joint initiative, allowing them the opportunity to practice the operational strategies needed to administer both assessments to the same students.
